“OUT BORDER”... EMBOSSING EXCEEDS THE LIMITS!

ENDLESS “OVERFLOWING” SOLUTIONS TO CUSTOMIZE YOUR NAPKIN

A RICHER, UNIQUE, ORIGINAL NAPKIN: BEYOND THE BORDER

From now on embossing becomes the protagonist of the napkin, it is no longer just an anonymous area of points, but it exceeds the limits with fantasy.

Do you want to impress? Customize each napkin with a different embossing "out border", enriching your package with two or more different patterns.

"Out border embossing" does not give only originality; it also offers multiple technical and functional advantages:

- **LONGER LIFE OF THE CYLINDERS**
- **VIBRATIONS REDUCED TO MINIMUM LEVEL**
- **ZERO WEDGE ZONE:** once the problem of the wedge is overcome, you can eliminate the micro dots and create stronger ones. The points that compose the embossing patterns cover the napkin in its totality, both in steel to steel and steel to paper applications.
- **CUSTOMIZED VOLUME OF THE PACKAGE**
- **GREATER VISIBILITY OF ENGRAVING**
